(PART 1, PART 2 & PART 3)

"Supply of Microsoft Licenses, Solution Implementation and Service Maintenance under SLA"

ICT Division, Head Office
Plot 12, Block A, Main Road
Bahundhara R/A, Dhaka 1229

March 09, 2020

The following amendment provides clarification and updates on the requirement of the project and should be read as accompanied with the originally published RFP.

SL	Details
01	**Chapter: Scope of Work, Page No 3, Part 1: Supply of Microsoft Licenses, Serial 8.** Mailbox Migration Tool: To collect and transfer 1475 mail data configured on users computer with mail client configuration (as individual mailboxes) on the branch end, and on the existing postfix mail server (as a web mail access), convert from pst file to individual mails, upload and make those mails accessible from new exchange deployment.
02	**Chapter 4: Instructions to Tenderers, Page No 9, Clause: 4.25** Training: In addition to mentioned information, training will be provided on Microsoft Professional Certification Course "20345-1: Administering Microsoft Exchange Server"
03	**Chapter 6: Solution, Page No 21, Clause: 6.1.1.12** Design and implement proper DNS, DHCP, File Sever, DFS, FSRM, Root CA (for same domain mail encryption) for the enterprise environment
04	**Chapter 6: Solution, Page No 23, Clause: 6.2.15** Exchange 2019 database online backup (Differential backup) should be configured and enabled on a day to day basis and a complete Normal Backup on week days. The same backup to be tested for recovering mailboxes and mails at regular intervals.
05	**Chapter 7: Technical Specification, Page No 27, Clause: 7.2.1 serial 09** The solution should enable enforcement of email retention settings on existing tape backup library so that emails can be retained, archived and deleted as per CUSTOMER policies.
06	**Chapter 7: Technical Specification, Page No 32, Clause: 7.2.6 serial 01** The solution should support unified Mail (Voice Mail) integration.
